***Examiner's Statement of Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: The claims present a series of circuit components arranged in a manner that is non-obvious over the prior art. Most notably, the inclusion of data routers which are both configurable between first and second modes to perform YCrCb to RGB conversion on either half a frame of pixel data or a full frame of pixel data, when combined with the other claimed limitations, renders the claims as a whole patentably distinct over the prior art. The disclosure enables the claimed limitations and teaches the beneficial arrangement of the claimed circuit arrangement as an improvement over similarly conventional systems in the prior art, such as found in US Patent No. 5,285,262 to Sims et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
